Abbreviations

PSPCL	Punjab State Power Corporation Limited
SOP	Standard Operating Procedure
TAT	Turn Around Time
BCP	Business Continuity Plans

1. Purpose

This purpose of this document is to define types and procedures for various types of changes in PSPCL IT environment.

2. Scope

The scope of this process includes:

- Allocating priority for any kind of change in IT environment
- Assessing the impact and resource required
- The approval processes
- Scheduling Implementation

The main tasks involved in change management are

- Manage the Change
- Administer the Change

3. Procedure

3.1 Priority and TAT

Priority and Turnaround Time of changes shall be decided basis on the following table:

Change Category	Description	TAT
Emergency	Based on any emergency requirement	1 day
High	If the implementation is a high priority and affecting service	5 days
Medium	If the implementation priority is medium and would affect service in log run	15 days
Low	Change needs to be implemented but not a priority	1 month

3.2 Change Request

Following are the keyreasons for any kind of change in IT environment of PSPCL:

- Changes in requirement requested by user
- Changes identified by IT Project team
- Business need
- User Complaints/Acceptance defects
- Any Government policy change
- IT infrastructure vendors, etc.
- Audit findings/Defects found in Test reports

Types of changes are classified in following broad categories:

- Configuration Change
- Hardware Change (in DC/DR/ Field Office)
- Application/Software Change (Addition / Modification / Deletion)

Change request shall be initiated by end user in the Change Request Form (Annexure 1).

3.3 Change Evaluation

Once any Change request is initiated, it will be forward to concerned process owner for Evaluation purpose in Change Evaluation Form (Annexure-2). Process owner shall carry out following steps while evaluation of change request:

- Feasibility Study
- Analyse the risk associated with the change.
- Review the implementation plan, including rollback schedule.
- Type of Change (Major/Minor) depends upon financial and risk implication
- Financial Implication (if any)

3.4 Change Approval

The Change approvers will vary as per below table based on type of change:

Sr.No	Type of Change	Change Approver
1.	Minor Change	CISO (Chief Information Security Officer)
2.	Major Change	ISC (Information Security Council)

- Change Approver analyse and review the change request and has opt one of the following two options:
  - Approve the change
  - Reject the change
- In case of rejection of change request, approver shall intimate and highlight the reason of rejection.
- In case any change is approved, it goes to the concerned process owner for implementation as per schedule.

3.5 Change Implementation

Once the change request has been approved by approving authority, concerned process owner shall follow the implementation procedure as mentioned in Patch and Software Installation Management Procedure.

For any hardware related change, concerned implementing team shall ensure to take the image and database backup of the respective system.

Concerned process owner shall also update Change Management Register (Annexure -3).

3.6 Roll-back Plan

This will contain the following information:

- Proper backup of respective system shall be ensured by the concerned process owner before implementing any type of change activity.
- Evaluation of estimated time of complete rollback.
- A step-by-step guide showing clearly the actions required to return service to its previous level, including any associated services affected by this change.

3.7 Configuration Management

Configuration Management refers change in any piece of hardware / Software / firmware used in PSPCL IT environment. The process of any Configuration change shall remain same as mentioned above.

In addition, concerned process owner shall update the details in Change Management register (Annexure-3)

4. Document Review

The document shall be reviewed after every year or as when required with the prior approval from the competent authority.

5. Reference
